The Mudrak & Sons ranges of tiles are covered by the manufacturers' warranties and the factories are happy to confirm that if their products are correctly installed, following current British Standard codes of practice and other appropriate guidelines, including but not limited to Domus installation guidelines, they will provide excellent performance and life expectancy. These tiles have been tested in accordance with the current European Standards (EN / ISO) and meet or exceed these requirements. Taking these facts into consideration, we anticipate the life expectancy, with correct maintenance procedures, would generally be for the life of the building (in the region of 25 years).

We are however unable to warrant any installations. Even though the products may have been installed in accordance with our recommendations and current British Standards, we cannot be held responsible for workmanship issues which may affect the long-term performance of the installation.

Warranty exclusions include damage caused by structural failure, incorrect installation, excessive deflection, substrate failure, flood, storms, earthquakes and other natural disasters or unforeseen circumstances such as acts of negligence, vandalism, product misuse including inappropriate use of access equipment, non-approved cleaning chemicals as well as the failure to comply with industry codes and regulations.

Correct Cleaning and Maintenance is essential to the continued performance of the tiles, as per the documents provided for inclusion into the contract's O&M Manuals.

We trust that these details meet with your requirements, but please do not hesitate to contact us for further information.

SUPERIOR ENGINEERED WOOD FLOORING

We have sourced only the finest quality boards and oils, manufactured by partners we have worked with for many years to our detailed product specifications.

The leading range of bespoke flooring

- Wide and deep planks
- Herringbone
- Rustic and prime grade finish
- Full range of solid wood colour match accessories
- Suitable for commercial and residential use
- Fully guaranteed to be fitted over most water based underfloor heating systems
- Can be laid directly to the subfloor or floated on to an underlay for better sound and heat insulation

In addition, every container is independently checked by an ISO inspector before being shipped to our factory to ensure the unfinished flooring meets our stringent quality levels.

Our engineered wood flooring has a top layer of oak supported by a composite core, making the boards extremely stable in a wide range of settings, as well as offering a host of other benefits and options.

We have invested in a state-of-the-art finishing machine in our factory, which can produce up to 300m² of finished boards per hour. Not only does this give us complete management of the process and materials, it also means we can keep lead times to a minimum and turn around large orders quickly.

We can also finish customers own flooring and accessories using our machine, with either one of our 45 quality UV oils or one supplied to us for specific project matching.

With full management of the end-to-end process we have managed to keep prices extremely competitive and are so confident in the caliber of Bespoke Woodflooring that all flooring comes with a 50 year warranty.

YOUR VISION

Simply select which boards you want, your choice of colour and matching accessories and let us do the rest. The Mudrak & Sons is made to order in our own factory with normal delivery lead times of 2-3 weeks.

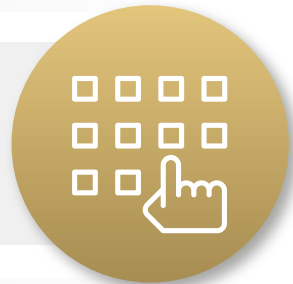

STEP 1: SELECT YOUR PLANK

Choose from 4 different styles with something for every project.

STEP 2: SELECT YOUR COLOUR

With 45 different options to choose from.

STEP 3: SELECT MATCHING ACCESSORIES

Complete your project with our range of accessories, colour matched to order.

Free samples of all flooring options are available to order.

In addition, a complete range of all finish and colour options in one convenient briefcase can also be purchased.

OUR EXPERTISE

FINISHED TO ORDER

Boards are passed through a continuous, automated line managed by a team of experts and undergo several processes to create the finished product.

Firstly, each plank is brushed to enhance the grain and open the pores of the wood for deeper penetration of the oils. The depth of the brushing can be altered to increase the textured appearance and finish. They are then de-nibbed to take off any raised areas of grain which may affect staining before the roller coater adds the coloured UV oil to the boards.

Following this they pass through two buffing pads to push the oil deep into the wood to ensure longevity of colour, followed by the UV drying machine which seals the colour in. Finally each plank is checked and packed, ready for delivery.

TRADE SAMPLES

You can order a full set of finish and colour samples in a convenient briefcase, making it easy for you to show your customers the full range of options available.
